ABSTRACT

The Upperclassmen Look at High School Survey was administered in April 1975 to randomly selected junior classes, along with the Vocabulary section of the Iowa Test of Educational Development. This survey was administered, along with the freshman survey in October, as a check on student attitude toward the following: new educational concepts, activity participation, high school facilities, peers, school, and teachers. Approximately 20 percent of the system's 5800 juniors were sampled. The junior results are compared with the freshman survey results throughout this report and include: (1) description of those surveyed, (2) comparative responses to new educational concepts, (3) comparative participation in activities, (4) comparative Likert Scale responses to statements regarding self, peers, school, teachers, and teaching methods, (5) comparative profiles, and (6) copy of upperclassmen instrument and item analysis. Also included in this report is a junior stability picture. (Author/MV)

UPPERCLASSMEN LOOK AT HIGH SCHOOL

INTRODUCTION

The Upperclassmen Look at High School Survey was administered in April 1975 to randomly selected junior classes, along with the Vocabulary section of the Iowa Test of Educational Development. This survey was administered, along with the freshman survey in October, as a check on student attitude toward the following:

New educational concepts
Activity participation
High school facilities
Peers
School
Teachers

Approximately 20 percent of the system's 5800 juniors were sampled (see Table I). The sampling ranged from 24.9% of the juniors at Maryvale to 12.7% at East. This variance was due to the degree of teacher cooperation received in administering the survey and student attendance.

RESULTS

The junior results will be compared with the freshman survey results throughout this report and will be color coded as follows:

Part	Color Code
1. Description of those surveyed	Green
2. Comparative responses to new educational concepts	Salmon
3. Comparative participation in activities	Goldenrod
4. Comparative Likert Scale responses to statements regarding self, peers, school, teachers, and teaching methods	Blue
5. Comparative profiles	Pink
6. Copy of upperclassmen instrument and item analysis	White

Also included in this report is a junior stability picture (See Table II). Systemwide, approximately 60 percent of the juniors have attended the school they currently attend for all three years. This ranges from 40.3% at Union to 71.2% at East. Second semester of 1974-75, approximately 18% of the current junior class enrolled.

Overall, Phoenix Union High School System juniors were undecided in response to "My counselor has provided me the help I need with my post high school plans" (1.96) and the need for a review of grammar (2.10). Strong positive agreement was noted in course variety (2.38) and worth of the courses taken (2.45). Slight agreement was indicated to the questions dealing with the review of math skills, needs not being met by the high school and library sufficiency.

RECOMMENDATIONS:

This report is intended to raise questions rather than provide answers. Therefore, the following recommendations are made.

1. Each school should review this report comparing itself to system figures and analyzing the data.
2. According to the student responses, much work remains to be done in the Phoenix Union High School System in the area of human relations.
3. Some areas for further study should be identified, such as what needs do students have which they think the high school should meet but doesn't.
